EGG - KLEEN (Multi Spectrum Egg Cleaner)

INTRODUCTION:

Export consignments and so also eggs sold in the local markets get rejected or have discounted value in case they are found dirty in appearance on account of dust, dirt, deposits, soiling etc., NARSIPUR have developed EGG - KLEEN as the ideal choice for the removal from eggs, of all kinds of organic soiling occurring in farms and hatcheries. EGG - KLEEN is a specialized concentrated multi spectrum sanitizer and cleaning agent, providing an easy and highly effective solution for cleaning eggs.

ACTIVE INGREDIENTS:

EGG - KLEEN is based on a unique combination of complexing agents and surface tension reducing compounds in an alkaline solution.

UNIQUE ADVANTAGES:

- EGG - KLEEN combines superior cleaning power with
- Outstanding degreasing and deoiling capacity
- Rapid activity hence requires less contact time
- Excellent foaming characteristics
- Completely bio-degradable and environment friendly
- Compatible with all NARSIPUR disinfectants
- Very economical
- Safe, non-toxic and easy to use
- Very low corrosivity

APPLICATIONS:

A. For manual wash:

1. Add 20-25 ml in 1 ltr of water.
2. Dip eggs into the solution for 10 seconds.
3. Take out & scrub it with brush.
4. Once again dip the eggs into fresh water to remove loosely bound soil.

B. For Machine wash:

1. Add 10 ml in 1 ltr of water.
2. Spray the solution on the eggs before putting them into the cleaning machine.
3. Or dip the eggs in the diluted solution for 10 seconds and then put the eggs into the cleaning machine.

SAFETY:

Gloves and goggles should be worn.

In case of contact with the concentrate, the affected areas must immediately be rinsed with plenty of water.
