

ENCIKLIN-PL56 (Specialty Pipeline Cleaner)

“Keep pipes, nipples and cooling pads clean with Enciklin”

INTRODUCTION

The strength of poultry lies in water management and hence pipelines which carries water play an important role. These pipelines get blocked due to deposits of dirt, algae etc. which result in the improper flow of drinking water and medication to the birds. Depending on the location and situation of the farms / hatcheries / plants, various types of deposit formation could occur. Hard water gives scale formation and dirty water forms dirt and dust besides deposit, thereby virtually clogging the pipes. Similarly, in the case of cooling pads in EC sheds, the efficiency of cooling gets reduced substantially. For easy and effortless removal of all kinds of dirt, deposits etc and for the proper maintenance and correct flow of water in pipes and nipples and higher cooling efficiency of cooling pads, it is necessary to clean them regularly with **ENCIKLIN-PL56**. Due to the special characteristics of the high quality ingredients in **ENCIKLIN PL-56**, it acts by first wetting and loosening the dirt, dust and deposits, whereas the selective ingredients frees and easily dissolves the scales.

ACTIVE INGREDIENT

Complex forming organic and inorganic acids in a highly balanced composition, with stabiliser.

DIRECTIONS FOR USE

APPLICATION	DOSAGE (100 LTRS OF WATER)	METHOD
Nipples/ pipe lines	2 Kgs	Fill the pipes. Hold for 3 hours min. (best overnight). Drain and flush.
Pipeline system	3 Kgs	Circulate the solution for 1/2 hour by pump. Drain and flush.
Equipments	2 Kgs	Immerse for 3 hours. Remove and flush / wipe clean
Cooling pads	3 Kgs	Immerse the pads for 3 hours minimum. Alternately, circulate the solution for 1 hour. Drain and flush.

ADVANTAGES

1. Excellent algae, deposit, dirt, dust and scale removing capacity
2. Application only 2 – 3%
3. Highly cost effective
4. Foaming cleaning concentrate
5. Fast acting

PRECAUTIONS

Eyes, skin and clothing should not come in contact with the concentrate, If contact occurs, rinse immediately with fresh water

PACKING SIZE

1 litre, 5 litre and 50 litre
