

ENCIMOX-PT

INTRODUCTION

ENCIMOX-PT is a unique stabilized product having a broad spectrum of anti microbial activity. It has a proven destructive effect against capsulated and non capsulated virus. **ENCIMOX-PT** is recommended for terminal disinfection of sheds and so also for routine mopping and spraying operations in the hatcheries and feed mills. Mode of action is **ENCIMOX-PT** acts by the release of nascent oxygen (O) which oxidises and destroys all organic matter within a short period and hydroxyl radicals (OH), which react with the functional proteins of microbial cells and viruses. The unique synergistic action of the ingredients of **ENCIMOX-PT** destroys the cell membrane and ruptures the cells. The potent protein denaturant action of **ENCIMOX-PT** gives sporicidal activity.

ACTIVE INGREDIENTS

Highly balanced composition of per acetic acid, peroxide, organic acid and mineral acid together with stabilizers in an aqueous base.

APPLICATION

Finds wide application for water sanitation, pipeline flushing, equipment dip and general cleaning as under:

DIRECTIONS FOR USE

APPLICATION	DILUTION IN WATER	METHOD
Water sanitation	1 ml in 40 ltrs	Add daily
Pipe line flushing	100 ml in 10 ltrs.	Keep lines filled for 8 hours minimum
Hatchers and setters	30 ml in 10 ltrs	Spray and mop
General cleaning	100 ml in 10 ltrs	Spray
Metal equipments	10 ml in 10 ltrs	Soak for 30 minutes
Plastic equipments	30 ml. in 10 ltrs	Soak for 30 minutes
Overhead tanks	1 ml in 30 ltrs	Add daily

ADVANTAGES

1. Powerful broad spectrum multi-purpose disinfectant
2. Non corrosive and non staining
3. Fast acting
4. Highly economical
5. Almost completely biodegradable
6. Safe & most powerful sanitizer at reasonable cost
7. Broad spectrum biocidal activity & is effective in presence of bacteria, fungi, virus, & spores
8. Continuous use results in a tremendous & drastic decline in medication cost
9. Effective in the presence of organic challenge
10. Non foaming and non toxic at user dilutions

PRECAUTIONS

1. Avoid contact with concentrated solution. In case of contact flush with large quantities of water
2. Handle with care
3. Store in a cool dark place, away from sources of heat & light.
4. Use protective glasses and gloves while handling **ENCIMOX-PT**

PACKING SIZE

5ltr, 10ltr, 25ltr.
