FUMIGENE-nX

(Best fumigant for closed areas)

INTRODUCTION

There are several challenges of Bio-security that Poultry Farming encounters and one of them is managing fumigation and disinfection. NARSIPUR Chemicals, a leading name in the poultry biosecurity range of products manufacturer and supplier, offers a unique fumigator, FUMIGENE-nX to tackle the issue of fumigation.

ACTIVE INGREDIENT

polyoxymethylene polymer compound 98%

APPLICATIONS

Arrange all the units equidistant from each other throughout the premises

Remove the label / pierce through the sticker to expose the holes of the upper container light the wick of the candle

Allow 3 to 5 minutes for the wick to burn and reach the centre of the wax pool

Vacate the premises immediately after lighting the candle. Later it takes 20 to 30 minutes to complete the fumigation process.

For better results, totally enclose the area to be fumigated before starting the fumigation process.

ADVANTAGE

1. Ready to use and highly cost effective
2. Immediate acting Proven efficacy
3. Reduced medication costs
4. Better litter management
5. Helps control mold growth in litter
6. Safe, stable, no side effects, indefinite shelf life if stored in airtight conditions
7. Non-toxic and non-flammable
8. There is no chemical reaction, no by products or side effects
9. Reduces waste disposal cost

PRECAUTIONS

1. In general, goggles, gloves and boots should be worn while handling and using chemicals
2. In the event of contact with eyes, wash immediately with abundant water and consult a specialist

PACKING

30 g seal packed in a disposable tin container
