

ENCIDET-MARS

Acidic cleaning concentrate

INTRODUCTION

ENCIDET-MARS is a speciality acidic cleaning concentrate specifically developed for the weekly cleaning of all milking equipments, milk tanks and churns, which ensures removal of all kinds of deposits.

COMPOSITION

ENCIDET-MARS is a complex combination of various speciality high quality acids, safe chemicals and surfactants besides auxiliaries.

DIRECTIONS FOR USE

A 3% concentration (3 litres of **ENCIDET-MARS** mixed with 100 litres of water) is recommended. First of all mix **ENCIDET-MARS** in warm water of 60° C. Then circulate the solution for 30 minutes to ensure proper cleaning and removal of all deposits. Subsequently, rinse thoroughly with normal water to complete the cleaning process.

ADVANTAGES

1. Quickly and completely soluble
2. Easily rinsed off
3. Easy and quick to apply
4. Non corrosive to the metal surfaces
5. Highly economical
6. Does not impart off flavours to milk and milk products
7. Eco-friendly as it is almost completely biodegradable

PRECAUTION

- Avoid direct contact of the concentrate with the eyes and the skin
- It is recommended that goggles be worn
- Should any contact occur, rinse immediately the affected parts with plenty of water

PACKING SIZE

5 litres and 50 litres in HDPE cans/carbuoys.
