

ENCIKOL-XP

(High performance broad spectrum disinfectant)

INTRODUCTION

ENCIKOL - XP is a very efficient, multipurpose high level Broad Spectrum Biocide, with very fast action, long residual effect even at low concentrations. It is a perfect synergistic blend of a cationic polymer, biguanide quats, activators, stabiliser and biodegradable surfactant. It has outstanding bactericidal, fungicidal, virucidal, algaecidal, slimicidal and sporicidal properties. Its performance and extremely low toxicity make **ENCIKOL - XP** a product of choice for biosecurity.

ACTIVE INGREDIENT

Each 100 ml contains NLT (Not Less Than % w/v)
Didecyl Dimethyl Ammonium Chloride : 8.0
N-Alkyl N-Benzyl -N-N-dimethyl benzyl ammonium chloride : 7.0
Poly (Hexamethylene) biguanide hydrochloride : 1.0
Stabilisers and Excipients : Q.S

APPLICATIONS

ENCIKOL - XP is effective in a wide range of disinfection applications such as:

Poultry Farms and Hatcheries
Dairies
Food processing plants
Breweries
Veterinary establishments
Hospitals

ADVANTAGE

1. Wide range of exceptional biocidal activity
2. Effective even in presence of organic matter and hard water
3. Ultra fast action, long residual effect
4. Low toxicity
5. Non corrosive to metals, rubber, wood and plastic at user dilution
6. High UV and temperature stability
7. Environment and user friendly

PRECAUTIONS

1. Gloves and goggles should be worn while handling the product
2. In case of contact, the affected areas must immediately be rinsed with plenty of water.

PACKING

Available in packing's of 1 litre
