ENCIQUAT-LPC

(Lauryl pyridinium chloride)

INTRODUCTION

ENCIQUAT-LPC is a product of NARSIPUR CHEMICALS which finds wide application in the textile sector. It is a brownish semi solid substance with germicidal properties. In textile it finds application as a fabric softener. Its antistatic properties are useful in the processing of man-made fibres, along side these it finds its use as a cationic detergent, a fat emulsifier and as an additive to viscose rayon spinning solution and cogulation baths

ACTIVE INGREDIENTS

Dodecyl pyridium chloride

ADVANTAGES

1. Cationic in nature
2. Emulsifying property
3. Anti-static
4. Soluble in water and other organic solvents

PRECAUTIONS

1. Store in cool ventilated places
2. Substance in contact with hand:-Wash off with soap and plenty of water
3. Substance in contact with eyes:-Rinse liberally with water for a considerable amount of time
4. Substance swallowed:-Never give anything by mouth to an unconscious person and rinse mouth with water

PACKING

Available in 50 kg packing
