INTRODUCTION

ENCIPOND-BB helps keep the water balanced. In addition to creating soft and soothing water. This product helps suppress algae growth and is proven to improve water clarity. It also softens water to skin and eyes. **ENCIPOND-BB** is stable in water is not degraded by sunlight. It plays a very important role, having an easy to maintain and trouble free Aqua Pond.

COMPOSITION

Sodium Tetraborate: q.s
Hydrogen Peroxide : q.s

USAGE

SIZE OF POOL ENCIPOND-BB
2000 Ltrs 650 ml
4000 Ltrs 1250 ml

STORAGE

Store in a cool dark place, away from sources of heat and light.
Once the container is opened, the product should be closed tightly and used within one month of the opening.

ADVANTAGES

- ❖ Enhances chlorine performance and extends chemical life.
- ❖ Maintains stable pH further reducing other chemical cost.
- ❖ Makes skin feel smooth.
- ❖ Only a single application with annual top-up is needed.
- ❖ By helping to maintain a stable pH, ENCIPOND-BB reduces the amount of chemicals needed to adjust pH levels.
- ❖ Your energy costs will be reduced because using ENCIPOND-BB allows you reduce the pump time required to keep their pools clean by up to 40%.
- ❖ Since ENCIPOND-BB keeps pH under control, the effectiveness of chlorine not be tampered with and this means that algae will not there.
- ❖ When you use ENCIPOND-BB the water will remain clear for a long since chloramine (or combines chlorine) does not form quickly as compared to a pool without a ENCIPOND-BB agent.
