

POLYCLEAN-HE (Multi-spectrum cleaner)

INTRODUCTION

POLYCLEAN-HE is a concentrated multi spectrum cleaner and is the ideal choice for the removal of all kinds of organic soiling in farms, hatcheries, slaughter houses and food processing plants. **POLYCLEAN- HE** is based on a unique combination of complexing agents and surface tension reducing compounds in an alkaline solution.

APPLICATION

POLYCLEAN- HE can be applied manually, with pressure washers or with modern foaming equipment for the removal of:grease, fat, oil, bloodmanure, faeces, feed residues and other organic matter.Increased water temperatures further improves the cleaning power of the product, generally 2-3 % solution of **POLYCLEAN- HE** is sufficient for conventional cleaning.

ADVANTAGES

1. **POLYCLEAN- HE** combines superior cleaning power with outstanding de-greasing and de-oiling capacity
2. Compatible with all NARSIPUR disinfectants
3. Excellent foaming characteristics
4. Extremely low corrosivity
5. Completely bio-degradable

PRECAUTIONS

1. Gloves and goggles should be worn while handling
2. In case of contact with the concentrate, the affected areas must immediately be rinsed with water
