

# UNIDROP

(Liquid drop concentrate)

## INTRODUCTION

UNIDROP is a powerful concentrated liquid detergent for general cleaning.

## APPLICATIONS

UNIDROP finds wide applications because of its powerful wetting, detergent, emulsifying, dispersing properties, combined with stability to acids, alkalies, metallic salts, oxidizing and reducing agents

## DIRECTIONS FOR USE

1. De-greasing : 2 to 10 grams per litre
2. Wetting : 0.2 to 1 grams per litre.

## ADVANTAGES

1. Soluble in water in all proportions forming highly foaming solutions
2. Excellent surface tension reducing, powerful wetting and penetrating properties
3. Excellent emulsifying and dispersing powers. stable to high temperatures
4. Stable to dilute acids, alkalies and metallic ions such as Ca, Mg, Cu, Fe, and others at all temperatures
5. Its performance is not affected in hard water
6. Stable to oxidizing and reducing agents
7. Non-flammable, non-volatile, non-toxic
8. No irritating or other harmful effect on skin

## PACKING

Available in packing's of 500ml and 5L
